

Bluefin Step-Silent

2967

Water-based, creak-free, anti-slip sealing coat for stair treads, for use in industry and trade

PRODUCT DESCRIPTION		
Transparent, water-based, creak-free sealing coat with anti-slip properties for stair treads, can be used as either a single or two-component product; very good abrasion resistance, very good filling performance, good block resistance, very good chemical resistance, good transparency, very good stability on vertical surfaces, resistant to cream and grease.		
 ÖNORM C 2354 High usability is achieved if a casting application is done three times with respective intermediate sanding; the requirements of stress class A and B according to ÖNORM C 2354 are met; stress class C (when 2K processing) 		
 ÖNORM Z 1261 (walkable surfaces) Confirmed by an external test certificate. class I (> 0.44 μ), when dry 		
 DIN 51130 (anti-slip property) Confirmed by an external test certificate. 0.30 - 0.45 μm dry. 		
 BGR 181 and DIN 51130 Confirmed by an external test certificate. Meets the requirements of slip resistance class R9, if 10 % ADLER Aquafix S grob 91201 is added to the topcoat. 		
 ÖNORM A 1605-12 (furniture surfaces) Resistance to chemical reactions: for 1C-processing: 1-B, for 2C-processing: 1-B1 Response to abrasion (for 1C- and 2C-processing): 2-C (≥ 150 U) Response to scratches: for 1C-processing: 4-E (≥ 0.9 N), for 2C-processing: 4-D (≥ 1.0 N) 		
 ÖNORM A 3800-1 (fire behaviour) In conjunction with a flame-retardant substrate: flame-retardant, Q1, Tr 1 		
 French ordinance DEVL1104875A Marking of construction coating products for their emission of volatile pollutants: A+ 		
For spray coating of stair treads and wooden floorboards in trade and industry.		
Makes surfaces slip-resistant and creak-free.

Our instructions are based on the current state of knowledge and are intended to advise the buyer/user to the best of our knowledge, but must be individually adapted to the areas of application and processing conditions. The buyer/user is responsible for deciding on the suitability and use of the supplied product, which is why we recommend that a sample be produced to check the suitability of the product. In all other respects, our General Terms and Conditions of Sale apply. All previous data sheets lose their validity with this edition. We reserve the right to make changes to container sizes, color shades and available gloss levels.

	PROCESSING		
Processing instructions	 Please stir the product before use. 		
	 The temperature of the product and object, and the room temperature must be at least + 15 °C. 		
	 Bluefin Step-Silent (2967) can be used in a one or two-componen process. We recommend two-component processing on account of the higher resistance and meeting the highest stress category C in accordance with ÖNORM C 2354. 		
	 High usability is achieved if Bluefin Step-Silent (2967) + 7 % Aqua Hardener 8450 (8450) is sprayed three times with respectiv intermediate sanding; the requirements of stress class C (particular) intense stress) according to ÖNORM C 2354 are met. The requirements of Performance classes A and B can be met using the product in the single component version. 		
	 Various types of wood such as Oak, various exotic woods, etc. contair water-soluble substances, which become active when overcoating wit water-based furniture coatings. To prevent discolouration or mark (these can be more or less pronounced depending on the origin of th wood), when coating oak, larch and other types of wood rich in activ substances we therefore recommend priming them first with Adur Primer (2523). 		
	 You should only use a roller to apply Bluefin Step-Silent (2967) o smaller surfaces and using a flocked foam roller. 		
	 The more matt the surface finish, the more visible shiny marks fror repeated mechanical stress to the coated surface will become. 		
	 Creak-free providing the staircase is properly installed and bui (construction, accuracy of fit, wood moisture). 		
	• As regards creaking, for recessed stair treads we recommend usin Bluefin Step-Silent as a single-component product or mixed with 3 S Aqua-Hardener 8450 (8450) and the coated components should b allowed to dry for at least 3 days - ideally 7 days - before constructing th staircase.		
	 For enhanced slip resistance you can add 10% Aquafix S (8110) to th topcoat. 		
	 Any change in the processing sequence, environmental conditions, nor observance of instructions or the use of products not listed may have a unfavourable effect on the result. 		
	 Please follow our ARL 150 - Working guidelines for water-based furnitur coatings. 		
Blending ratio	100 Part(s) by weight Bluefin Step-Silent (2967) 7 Part(s) by weight Aqua-Hardener 8450 (8450000210) Aqua-Hardener 8450 (8450000210) must be carefully worked into the product by stirring before processing.

	MAINTENANCE AND RENOVATION
Cleaning and Maintenance	Stairs should be cleaned from time to time with a cloth moistened with Clean-Möbelreiniger (7202). This allows stubborn dirt and scuff marks to be removed. Then wipe the surfaces dry.
	We would advise against the use of commercially available parquet care products to maintain your parquet flooring as they can make the floor very slippery and dangerous.

Colour shades / Glosslevels	Bluefin Step-Silent G10 (2967000110) Bluefin Step-Silent G30 (2967000130) Bluefin Step-Silent G50 (2967000150)
Supplementary products	Aduro Primer (2523) Aqua-Cleaner 8029 (8029) Aquafix S Grob (91201) Aqua-Hardener 8450 (8450) Clean-Parkettreiniger (7207)
	Please refer to the corresponding technical data sheets of the products.
	FURTHER DETAILS
Durability / storage	Min. 1 year(s) in the original sealed containers.
	Make sure the product is protected against moisture, direct sunlight, frost and high temperatures (above 30 °C).
Technical specifications	Delivery viscosity: 1,400 – 1,600 mPas (Brookfield spindle 4/20 rpm/2 min/20 °C)
Safety information	The product is only suitable for the industrial and professional use.
	The inhalation of paint aerosols during spray application must generally be avoided. This is ensured by the proper use of a respirator (combination filter A2/P2).
	Further information on the subject of safety during transport, storage and handling as well as disposal can be found in the relevant safety data sheet. The current version can be accessed on the Internet at www.adler-lacke.com.
